

Meeting Minutes

14.01.21

Members Present	Ivan, Darius
Creator	Ivan
Date	14.01.21
Time	13:58

Absences

Stevens - Not at fault (Was not added to this discussion due to the nature of the discussion)

Agenda

Discussion was oriented around grasping and establishing a clearly defined structure to the back-end of our project, defining clearly the folders, databases, names and content and methods. Tasks were also discussed in some detail. User permissions were of the topic and so was implementing a level of censorship.

Meeting Notes

- Login
 - UserName
 - Password *Foreign Key*
 - OTP (One Time Password)
 - Details *Foreign Key*
 - Handshake
- Profiles (Users)
 - ID
 - * *Foreign Key*
- Detail
 - First Name
 - Surname
 - E-mail
 - D.O.B
 - Location
 - * *Foreign Key*
 - * Coordinates
 - * Restrict Area
 - * Manually Input
 - * Data received from Geo location
- Messages

- Unique Key: varchar
 - Note: Table per chat
- Keys
 - Pseudonym Tools:Varchar
- Censorship
 - note: Text based, followed by a shell script that checks the text against the input

Meeting Summary

The meeting was very successful in establishing a detailed although not finished structure to the back-end of our project, with the UML diagram and this combined we have some understanding into what the application will function internally.
